Weight Watchers Bathroom Scales by Conair

Weight Watchers bathroom scales are the best tool for monitoring weight and body analysis in the comfort of your own home.

Use Weight Watchers bathroom scales to:

- Evaluate the effect of diet and exercise on your body
- Monitor changes in your overall health and fitness, including weight using the advanced weight tracking system
- Help reduce the risk of developing health related problems.

Weight Watchers bathroom scales measure*:

- Body weight
- Body fat
- Body water
- BMI (Body Mass Index)
- Bone mass
- Muscle mass
- BMR (Basal Metabolic Rate)
- Weight Tracking

Body Analysis made simple with Weight Watchers!

Unique to Weight Watchers!

Weight Watchers bathroom scales use an easy to understand, colour coded tick bar system to tell you exactly what the scale measures – helping you make the right choice when purchasing weighing and body analysis scales.

Weight Watchers bathroom scales measures body analysis using a method called bioelectrical impedance analysis.

Bioelectrical impedance is:

- An indirect method of measuring body analysis
- A very safe and very low electrical current sent through the lower half of the body (from the feet to the waist)
- An electrical current which flows more quickly through water and muscle than it will through bone and fat.

The bathroom scale measures the speed of this current and then estimates body analysis using a multi-step mathematical formula.

To see how your body analysis readings compare to the healthy ranges in your gender and age bracket, a body analysis table is included in every Weight Watchers bathroom scale to help you evaluate your body analysis measurements.

CAUTION: Use of the body analysis function on Weight Watchers bathroom scales by persons with any electrical implant, such as a heart pacemaker, or by pregnant women is not recommend. However, the use of the weight function is most suitable.

If you have concerns about the use of the body analysis feature, consult your doctor.
**Weight Tracking & Body Composition Expert**

Model WW8988A

This one’s got the lot for expert weight management and the ongoing monitoring of body composition. The slimline design features advanced weight tracking technology that can store data for up to 12 users.
